

Fully automated material feeding, automated sensor mark positioning, automated punching, automated skeleton off-take.
 Exported servo motor and high precision ball screws as well as high sensitivity photoelectric recognition device to read the position marks for precise and reliable positioning.
 Punching tool is made by imported die steel, the card edges are extremely smooth.
 PC punching tool can be customized.

Full Automatic Punching Machine

Full automatic, High efficiency and Safe.

WL-HSA-3C/4C/5C Full Automatic Punching Machine

Technical Parameters

| | |
|------------------------|---|
| Suitable for | PVC、PET、PETG、PC or other plastic materials |
| Layout | 3×8/4×8/5×5 |
| Controlling Method | PLC |
| Punching Power | Servo system |
| Punching Precision | ±0.10mm |
| Card Collecting Method | Three / four/five rows of card collecting boxes |
| Air Source | 6 kg/cm ² |
| Air Consumption | 150 L/min |
| Power | AC380V 50-60Hz 5.5KW |
| Productivity | 16000-24000 cards/hour |
| Machine dimensions | 3000(L)×1240(W)×1750(H)mm |
| G.W. | About 1800KGS |
