

Automatic High Speed Servo Motor
Punching Machine

Exported servo motor with stronger punching strength and faster punching speed.

High precision ball screws as well as linear guide for accurate moving distance.

High sensitive photoelectric recognition device for precise and reliable positioning.

Imported mould steel is adopted for punching tool which is durable. Card edges are smooth.

Speedy, Durable, Accurate

WL-HS-3A/4A/5A Automatic High Speed Servo Motor
Punching Machine

Technical Parameters

Suitable for	0.3-1.0mm PVC or other plastic materials
Layout	3×7/3×8/4x8/5x5
Feeding	Manual
Number of the Optional Punches	3/4/5
Max. Punching Strength	0-5000 kg Adjustable
Punching Method	Servo Motor
Air Source	0.6 MP a
Air Consumption	100 L/min
Power Source	AC380V / 50-60Hz
Power	4.5KW
Controlling Method	PLC
Productivity	12000-15000 Cards/Hour
Dimension	1520(L)×820(M)×1800(H)mm
Gross Weight	Approx. 1,000 KGS

The actual product maybe not totally same as above photo, pls be subject to the actual product.
